

Company Profile 2014

Digi Kiosk

Digi-Kiosk is an innovative and dynamic kiosk and digital signage manufacture located in Denmark.

We provide professional and interactive kiosk solutions - for indoor as well as outdoor use - digital signage and tablet displays to satisfied customers all around the world.

Our solutions are highly inspired by the strong and well-known Scandinavian design traditions and all our products are “Made in Denmark”, ensuring a high level of quality.

Design with a purpose

Our products are made from high quality, ultra-thin, aluminum profiles.

We use our unique modular profile system when we construct the kiosks and it allows us to fulfill your needs, no matter what size or extend of applications you require.

We always consider all aspects of design, construction and maintenance and provide you with a quality solution - no matter if you're looking for a customized or standard kiosk.

Indoor solutions

Digi-Classic is an sleek and modern-looking kiosk, that fits perfectly into any surrounding

Digi-Classic is an elegant kiosk featuring a slim housing. Digi-Classic can be delivered in 19" (4:3) and 22" wide screen with our without touch and we offer tailor-made solutions that meet your specific need.

Its lightweight, makes it easy to transport making it perfect for temporary retail and exhibition displays.

Digi-Classic is available in any colour or size and it can be custom made with applications such as e.g. card reader, printer, scanner etc.

Are you looking for a graceful big screen solution in a slim design? Digi-XL is the answer!

Digi-XL is a slim and elegant big screen solution. The unit is only 9 cm thick.

The 42" screen can be positioned in portrait or landscape format and Digi-XL is available as both floor stand and wall-mounted model.

In line with many of our other products we offer to add a number of applications as well as colour and graphic options.

Functional and space saving wall-mounted kiosk in a elegant and timeless Scandinavian design

With a wall-mounted Digi-Image 19" (4:3) or 22" wide screen, you will have an elegant and timeless designed space saving kiosk.

The wall-mounted kiosk is available in two different models depending on the need of applications - a very slim model and a more service-friendly model, easy to service by unlocking the front of the kiosk allowing easy access to all the technical components.

Digi-Image can be custom made with applications such as e.g. card reader, printer, scanner etc.

Digi-Function is a highly versatile and functional kiosk perfect for several self-service applications

Digi-Function is available in 19" (4:3) to 42" wide screen. It is the most functional kiosk in our product range. It is a very flexible and user friendly kiosk which makes it ideal for any kind of self-service.

The front of the kiosk can be opened using a key. This makes the kiosk extremely easy to service with access to all technical components.

It is possible to place monitors in different heights on both front and back on the enclosure, making the kiosk very children- and disabled-friendly. The kiosk is available in any colour or size.

Tablet solutions

Why not take full advantage of your tablet and use it as a floor standing or wall-mounted information screen?

Integrate any 9,7” to 12” tablet into our slim floor standing or wall-mounted tablet display.

The tablet is positioned either in portrait or landscape format and an anti-theft system protects the device against theft and unwanted access to cables etc.

The frame that holds the tablet in place can easily be replaced if you later on wish to use a tablet with another dimension – leaving the body of the enclosure unchanged. This unique feature makes Digi-Tablet long-lasting and extremely versatile.

Our tablet solutions are ideal for exhibition stands or temporary presentation needs.

Outdoor solutions

Digi-Outdoor is the perfect kiosk solution in front of your headquarter, in open public places and amusement parks

Our Digi-Outdoor is a kiosk specifically designed for any outdoor applications and the technology inside is safely protected through a watertight, fully acclimatised and vandal proof casing.

Digi-Outdoor is available in any colour and several sizes. We offer both ground stands and wall mounted models.

On the ground stand model it is even possible to place a monitor in different height on both front and back of the kiosk, making Digi-Outdoor very children- and disabled-friendly.

Highly tested and proven quality

We are always dedicated to ensure you a durable product that not only satisfies the users but also provides a durable and reliable solution that is attractive and without negative economic pitfalls.

Our work is characterized by a high level of finish and delicate precision. It is your guaranty for quality and well-proven solutions.

Customized solutions

We are very experienced producing customized solutions and we therefore offer a variety of attractive and user-friendly applications and add-ons.

Most of our products are available in any colour and size and we offer to customize them with applications such as e.g. card reader, printer, scanner, speakers, keyboard etc.

If you looking for a solution in line with ADA-regulations, we offer to add Braille and tactile text. In addition we are able to integrate two screens in different heights on a number of our kiosks.

Improve your message

If you wish to elevate your brand and attract extra awareness we offer a number of effective solutions.

All our products are available in a variety of colours and if you need a little extra attention, we offer to add decorative graphics and digital prints to the surfaces of the products.

As the surface on most of our products are interchangeable, it is ideal to exploit these areas for temporary communication and seasonal campaigns.

We take care

We use modern and ISO-certified Danish production facilities and our work is characterized by a high level of quality, precision and experience.

We always strive to reduce our footprint on the environment and a partnership with Dong Energy, a major Danish energy provider, enables us solely to use energy from sustainable sources.
