

FUNC WALL/FLOOR MOTORIZED

Do you believe in better ergonomics?

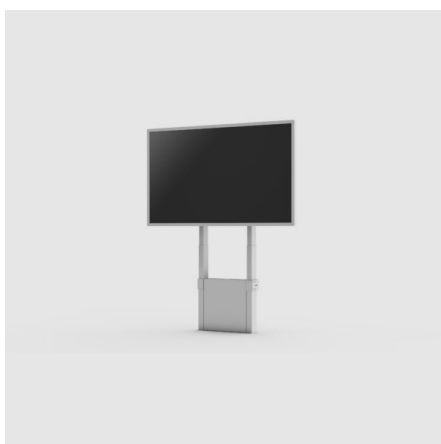

A basic mount for heavy displays on regular walls

Func Wall/Floor Motorized is easy to adjust for different needs. The very stable design is perfect for large heavy displays and touch displays. The motorized height adjustment ensures that the user can interact with the display in an ergonomic position.

The smart design shifts the weight to the floor, which means you can use a heavy display also on thin walls. Add to this the clever anti-collision solution - an obstruction when raising or lowering Func Wall/Floor Motorized will make the motor legs halt and reverse to avoid collision.

A storage box for e.g. codec, mini PC, or laptop is included. The box can be locked with a padlock (not supplied).

Now available also in white!
